Application No. 10/806,935 Amendment Dated October 11, 2005 Reply to Final Office Action Dated August 10, 2005

Amendments to the Claims:

Please amend the claims as follows. This listing of claims replaces all prior versions and listings of claims in the application:

Lisiting of Claims:

- 1. (Currently Amended) A method comprising:
- (a) providing a presence device associated with a communication device, the presence device operable in a first mode and a second mode;
- (b) if the presence device is operating in the first mode, biometrically authenticating a user using the presence device and receiving a presence confirmation input from the communication device;
- (c) if the presence device is operating in the second mode, receiving a userentered log-in input from the communication device and authenticating the user entered login input; and
- (d) in response to (b) or (c), updating a central presence database to indicate that the communication device is active <u>over a selected desirable route</u> for the user to receive at least one message.
- 2. (Original) The method of claim 1 wherein the communication device comprises a telephone, and wherein said biometrically authenticating comprises authenticating a voice of the user during a call using the telephone.
- 3. (Original) The method of claim 2 wherein the call is made between the user and a party, and wherein said authenticating the voice of the user is independent of the party.

Application No. 10/806,935 Amendment Dated October 11, 2005 Reply to Final Office Action Dated August 10, 2005

- 4. (Original) The method of claim 3 wherein the user is a calling party of the call.
- 5. (Original) The method of claim 3 wherein the user is a called party of the call.
- 6. (Original) The method of claim 1 wherein the communication device comprises a keyboard, and wherein said biometrically authenticating comprises authenticating a fingerprint of the user as the user types using the keyboard.
- 7. (Original) The method of claim 6 wherein said authenticating a fingerprint of the user is independent of a software application for which the user types using the keyboard.
- 8. (Original) The method of claim 1 wherein the presence device is embedded with the communication device.
- 9. (Original) The method of claim 1 wherein the presence device is removably interfaced with the communication device.
- 10. (Currently Amended) A system comprising:
 - a communication device;
- a presence device associated with the communication device, the presence device operable in a first mode and a second mode; and a

central presence database responsive to the communication device to indicate that the communication device is active <u>over a selected desirable route</u> for the user to receive at least one message in response to (a) biometrically authenticating a user using the presence device and receiving a presence confirmation input from the communication device if the presence device is operating in the first mode, and (b) receiving a user-entered log-in input from the communication device and authenticating the login input if the presence device is operating in the second mode.

Application No. 10/806,935 Amendment Dated October 11, 2005 Reply to Final Office Action Dated August 10, 2005

- 11. (Original) The system of claim 10 wherein the communication device comprises a telephone, and wherein said biometrically authenticating comprises authenticating a voice of the user during a call using the telephone.
- 12. (Original) The system of claim 11 wherein the call is made between the user and a party, and wherein said authenticating the voice of the user is independent of the party.
- 13. (Original) The system of claim 12 wherein the user is a calling party of the call.
- 14. (Original) The system of claim 12 wherein the user is a called party of the call.
- 15. (Original) The system of claim 10 wherein the communication device comprises a keyboard, and wherein said biometrically authenticating comprises authenticating a fingerprint of the user as the user types using the keyboard.
- 16. (Original) The system of claim 15 wherein said authenticating a fingerprint of the user is independent of a software application for which the user types using the keyboard.
- 17. (Original) The system of claim 10 wherein the presence device is embedded with the communication device.
- 18. (Original) The system of claim 10 wherein the presence device is removably interfaced with the communication device.
